## **Introduction**

Our group is group10, in this assignment we create a comprehensive booking room system. Forest Fridge Resort booking system, designed to streamline the process of reserving rooms and accommodations. In today's fast-paced world, where convenience and efficiency are paramount, our system offers a seamless solution for individuals and businesses alike. One of the key attractions of our booking room system is the convenience it offers. With just a few clicks, users can effortlessly browse through a wide range of available rooms, compare prices, and make secure reservations. We understand that customers value their time, and our system is designed to save them from the hassle of traditional booking processes. What truly sets our proposed system apart is the unique set of values and attributes it offers. Firstly, our system provides real-time availability updates, ensuring that users can make informed decisions based on accurate and up-to-date information. Additionally, our platform emphasizes personalized recommendations, taking into account user preferences and past booking history to offer tailored suggestions. Furthermore, our system facilitates seamless communication between customers and accommodation providers, enabling users to address any queries or special requests directly through the platform.
